

# Installing the Caster Assembly

Advanced  
**HEPA<sup>+</sup>**

You will need a pair of work gloves and a Phillips-head screwdriver.

**1**

Unplug the unit from its power outlet

(not pictured)

**2**

Turn unit upside down. Remove bottom cover using a Phillips-head screwdriver, to remove the 4 retaining screws. Set screws aside.

**3**

Place caster assembly over bottom of unit, aligning the 4 screw holes on bottom cover with those on the unit.

**4**

Assure bottom cover is snugly in place. Use screwdriver to screw the 4 retaining screws back into place.

**5**

Caster assembly installed.

**6**

Turn unit right side up (not pictured).
